GW4 + UWE Consortium Bid for a South-West Region Local Policy Innovation Partnership	Prof Nick Pearce University of Bath	Jan	bid to the UKRI to establish an LPIP responds directly to the political, economic and social diversity of the SW and to the policy challenges it faces and reflects the coastal, rural and urban communities and from the different tiers of government, including the LEPs and other economic partnerships that span the SW. The proposal seeks to engage with stakeholders and community partners from the key priority areas of the proposal which include environment, skills and innovation, community and culture, and health and well-being with the intention of involving them with the development of the core activities and structuring the policy themes to reflect the distinct levelling up, skills and innovation, Net Zero transition and health and well-being challenges of the region. The priority area of focus in the bid has been identified as the environment, specifically sustainable, efficient, and equitable land use, and food production.	Letter of endorsement sent
University of Plymouth-led Consortium South West Coastal Local Policy Innovation Partnership Bid	Sheena Asthana Director, Plymouth Institute of Health and Care Research (PIHR) University of Plymouth	Jan	The bid responds directly to the central inclusive growth priority the LEP and partners set out and the particular focus on challenges facing coastal communities builds on the themes identified in the 2022 report Social Mobility in the South West. The proposed LPIP geography also recognises the work over several years on the West Somerset Priority Education Investment Area. We are pleased to see the three priorities around digital innovation & skills, connecting communities to place and living and working in a greener economy and the broad spectrum of partners you propose to engage means the LPIP would be well-placed in each of these areas.	Letter of endorsement sent
